Thank You

Your gift to the JCAHPO Education and Research Foundation is greatly appreciated. Through generous support from individuals such as you, advances continue to be made in the field of eye care, and talented professionals receive the training they need to deliver this care to people across the globe.

For Excellence in the Future of Eye Care
The Demand for Patient Care

More than 11 million Americans today suffer from serious eye problems that cannot be improved by eye glasses or contacts, including:

- Cataracts
- Diabetic retinopathy
- Glaucoma
- Retinal, corneal, and congenital diseases

The number of individuals over the age of 65 is expected to increase by nearly 20% in the next several decades. But in spite of this projected growth, the number of ophthalmologists and allied ophthalmic personnel (AOP) is not expected to increase at this same fast pace.

The Need for AOP

Ophthalmologists increasingly rely on the skilled labor of certified AOP, freeing time for important patient diagnosis and treatment. The contributions of highly skilled, certified AOP enable ophthalmologists and clinics to function more efficiently. They are an important part of a successful eye care team.

Advantages of Certified AOP

Four out of five ophthalmologists believe that certified AOP make their practice more efficient through:

- Triage screening
- Troubleshooting
- Increase in number of patients seen per hour
- Effective patient flow
- Increased doctor productivity

“The contributions of highly skilled, certified AOP enable ophthalmologists and clinics to function more efficiently.”
